Member of the Yale community is tested for COVID-19 infection. **Result is positive.**
Result goes to **primary healthcare provider** who contacts the patient. Patient is asked to self-isolate, and is provided with additional guidance and referrals.
Patient is contacted by the **Yale Contact Tracing Team (YCTT).**
Patient may be contacted by their **local health department.**
Campus-based contacts of the patient (whose privacy will be respected) are identified and notified by **YCTT** of possible exposure.
Community-based contacts of the patient may be identified and notified by their **local health department** of possible exposure.
Close contacts are
• referred for testing
• advised to self-quarantine for 10 days and
• monitor symptoms
Lower-risk contacts are
• referred for testing
• advised to monitor symptoms
