Contact tracing 101.

Member of the Yale community is tested for COVID-19 infection. Result is positive.

Result goes to primary healthcare provider, who contacts the patient. Patient is asked to self-isolate and is provided with additional guidance and referrals.

Patient is contacted by the Yale Contact Tracing Team (YCTT).

Campus-based contacts of the patient (whose privacy will be respected) are identified and notified by YCTT of possible exposure.

Close contacts are referred for testing and advised to self-quarantine for 10 days and monitor symptoms.

Patient may be contacted by their local health department.

Community-based contacts of the patient may also be identified and notified by their local health department of possible exposure.

Lower-risk contacts are referred for testing and advised to monitor symptoms.

If you think you have been exposed, call the CCRL at 203-432-6604.
